I took a sewing class at Louisiana State University in college. I only got a C. Creating and making things brings me joy.

After Designing a line of Children's clothing .. I made medieval and renaissance clothing and dolls. All of this in the midst of teaching young people life skills and leadership, being a travel agent, a mom, a cook & high school teacher.

I made a few porcelain dolls ... They weren't my favorite .. they break . . .

I took a soft sculpture doll class.

Wow !! That was fun. She is a very fun and simple doll. This same type of doll was sent to "Katrina Kids" in 2005.

Practicing and studying with various teachers, I found I could create my own style of face and body. As I continue to study and practice .. I blend what I have learned to create a piece that expresses fun and heart.

I hope to share in each creation, real or imagined ... ***their Heart.***
